

Capability Statement

Marjen specializes in information systems assessment and testing

Marjen is an IT consulting firm that specializes in IT auditing, testing, independent verification and validation (IV&V) IT project management, and application development. Marjen has been providing services for over 16 years. Marjen staff have served as project managers, security control assessors, application developers, and independent reviewers for federal, state and commercial clients. We pride ourselves on our exemplary customer satisfaction rating and differentiate from other providers by applying customized, repeatable solutions to complex technology concerns. This increases consistency, reduces time requirements, and minimizes cost. Marjen’s goal is not merely to satisfy objectives, but to ensure that an organization’s IT posture is stronger at the end of our engagement than it was at the outset.
